

# 3DM-HTR

Photopolymer resin for high temperature resistant parts

3DM-HTR is a high temperature resistant material, which support a heat deflection temperature up to ~~200~~ **200 °C !**

3DM-HTR is designed for high temperature resistant parts that are ideal for RTV silicone moulding. This material is ideal for various applications requiring superior stiffness and high heat deflection temperature.

**Suitable for :**

- Mould
- Aerospace
- Automotive
- RTV silicone molding

**Your benefits :**

- High temperature resistant
- Superior stiffness
- High heat deflection temperature

---

## RESIN PROPERTIES

Color		Yellow
Viscosity	@ 30°C	90 mPa.s
Density	@ 25°C	1.12 g/cm <sup>3</sup>
Hardness (Shore D)	ISO 868	84
